

Rob [Brackett]

*Explorer. Engineer. Designer. **Builder of tools for real people.***

[Experience]

Apple, Inc. / Cupertino, CA

JS Frameworks Engineer, 2010–Present

- ?
- That's not a placeholder; I actually can't talk about what I'm working on.
- Really.
- We take the whole trade secret/competitive advantage thing pretty seriously.
- I promise it's interesting, though.

Appcelerator, Inc. / Mountain View, CA

UI Engineer, 2009–2010

- Designed and built new coding and debugging tools for use with Titanium SDK.
- Designed and built front-end for a unique new software analytics platform integrated with the Titanium SDK.
- Contributed to the open-source Titanium SDK for Desktop, iPhone, and Android.
- Served as the resident JavaScript language expert, helping to guide API design decisions towards a more "JS-native" feel.
- Improved database analytics/business intelligence calculations by 2700%.
- Led an effort to unify and organize Appcelerator's web-based services for better development, deployment, and reliability.

Involution Studios / Sunnyvale, CA

Lead Engineer, 2007–2009

- Directed a team in developing a general purpose UI framework and using it to subsequently build a large application for a leading computer security company.
- Developed full-on, in-browser WYSIWYG web page editor in JavaScript and HTML.
- Educated client engineering teams on new software architectures, development patterns, tools, and methodologies.
- Built and released an open source JavaScript library for managing text selections across different browsers.
- Quickly developed working prototypes of desktop and web-based software envisioned by design teams.

[Education &c.]

BS in **New Media Information Technology** with a minor in **Japanese Language**

Rochester Institute of Technology, Graduated November 2005; **3.92** GPA
